

GENB 4350

Assignment 1

Suggested Length: 500 to 600 Words

1. Task

Think of an ethical dilemma/issue that you experienced recently – one in which *you had to decide whether one choice or another was the more ethical*. This can be a situation you experienced at work, at home, or elsewhere.

First, briefly describe the situation and the decision you made. This should take up no more than approximately one-third of your paper.

Second, FULLY discuss your rationale for the decision. The **most important part** of this paper is that you **fully support** your decision (*i.e.*, provide a detailed explanation for your decision). This section of the paper should consist of about two-thirds of your paper.

You should review the sample papers before beginning the assignment. There are no online lectures to review for this assignment.

Please refer to the General Assignment Instructions for information about formatting and submitting your paper.

Note: Your paper should represent your highest quality work in terms of critical thinking AND writing.
